

BATHTUB INSTRUCTION

This instruction must be given to the user.

Guarantee/Liability only when assembled by an approved specialist in accordance with the instructions and local regulations.

USER MANUAL

Protection from damage Instructions for use

These instructions for use must be carefully read before installation.

Check on content of delivery and condition of the components

Check delivery after receipt for completeness and possibly damage (see parts list on page 4).

Inform the dealer immediately when damage is apparent. We are not liable for damage arising during or after installation / fitting.

Check door width before starting work

Does the bath pass through the door of the room in which the bath will be installed?

Lifting/moving

The bath must only be lifted/moved using the transport straps provided - never use the hoses or installation parts.

Laying circuits

Do not lay any circuits under the bath.

Use suitable protective covers to prevent damage to surfaces and blockages by dirt or dust arising during fitting. Cover sensitive components (drain, nozzles, control panel) temporarily with a protective cover before starting the installation / fitting.

Special precautions

When cleaning the tiles, make sure that no ammonia or a similar aggressive cleaning agent come into contact with the installed parts.

Checking that the tub is waterproof

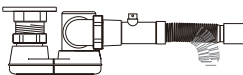

After connecting the water supply and drainage pipes, the tub must be filled and examined to ensure that it is waterproof.

Changes allowed: Tona reserves the right to make changes or modifications on any of its products without notice.

PARTS LIST

After unpacking, please confirm the parts and quantity according to the following.

INSTALLATION NOTES

(1) Bathtub installation preparation

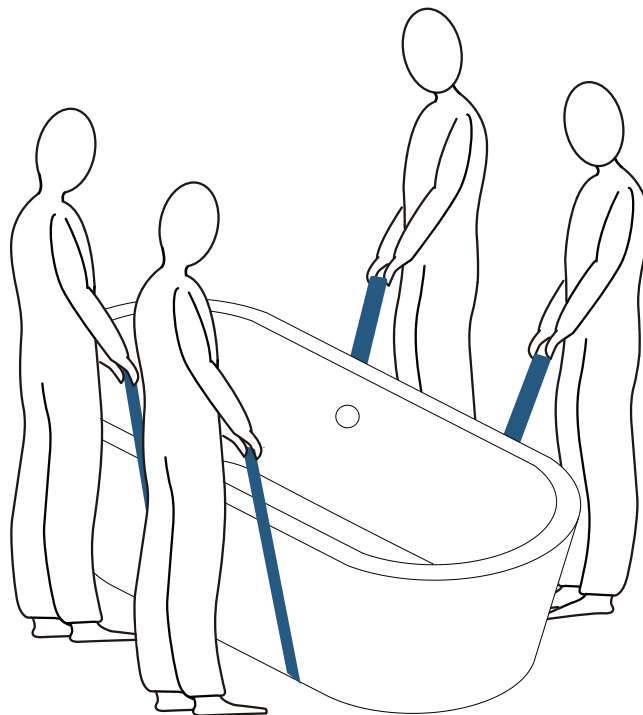

Please make sure that the size of the bathtub is more than 100mm and determine the installation position of the bathtub.

(2) Handling bathtub

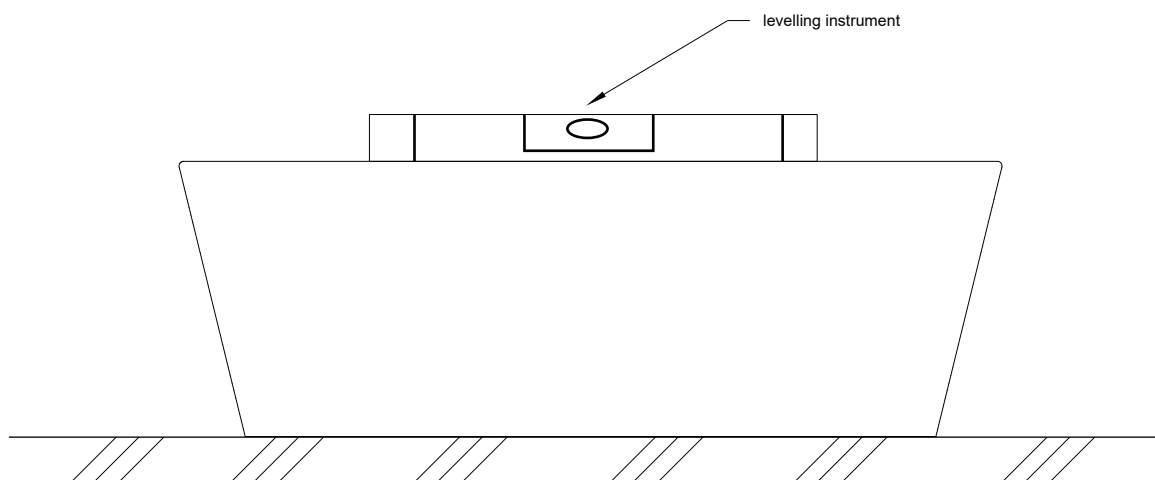

Please use the carrying belt to carry the installation bathtub. (The carrying belts are not supplied)

(3) Bathtub installation

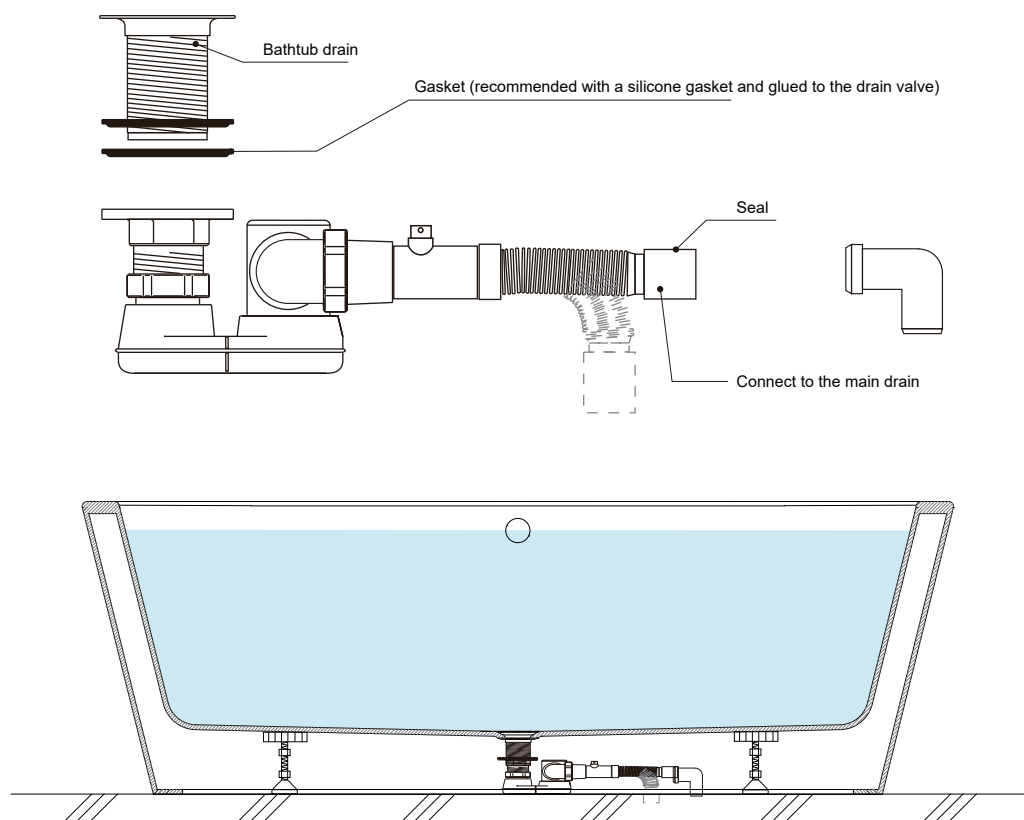

Please install the bathtub horizontally

(4) Connecting drain

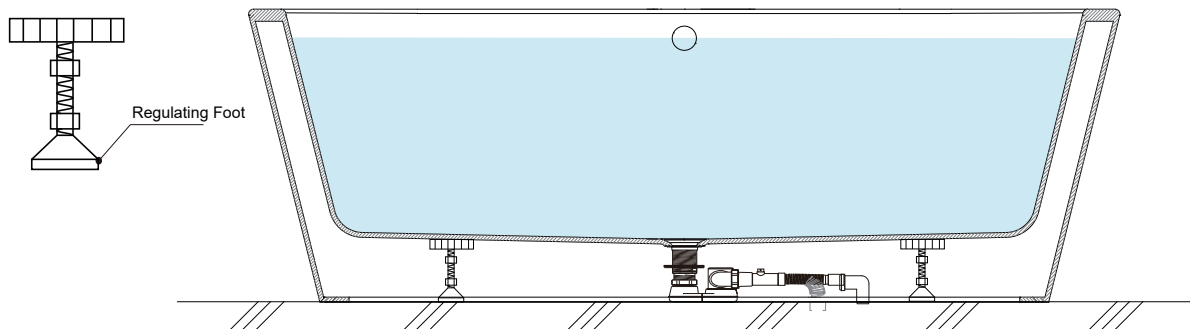

Connect the bathtub drain fitting to the drain. (After installation, injecting water to check if the sealing is good)

(5) Adjustment stability

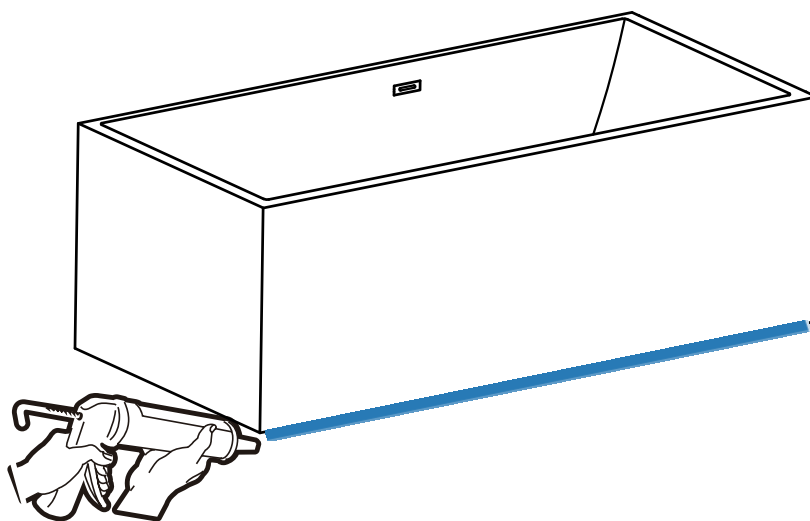

Adjusting the overall stability of the bathtub with a adjustable foot .

(6) Fix bathtub

Fix the base to the floor with silicone and wait until it is firm before moving to the next construction.

(7) Sort out

When the bathtub is installed, first clear up the floor, and finally clean the bathtub with a rag and a neutral detergent to keep the bathtub clean and beautiful.
